SUMMARY

Frontend engineer comfortable working with Git-based workflows, including feature branches, pull requests, merge conflict resolution, and code review.

Able to break frontend requirements into smaller implementation tasks and communicate progress or blockers clearly.

Experienced in receiving code-review feedback and improving implementations based on team conventions.

Familiar with collaborating with designers through Figma and translating UI designs into responsive frontend components.

Able to document component behavior, technical decisions, setup instructions, and known limitations.

Familiar with Agile practices, issue tracking, sprint planning, and participating in technical discussions.

WORK EXPERIENCE

CafeBazaar

Frontend development Intern

Tehran, Iran
2025 – Present

Frontend Refactoring – A/B Testing Management Panel (Cafe Bazaar)

Refactored and enhanced the frontend of an internal A/B testing management panel used by Cafe Bazaar.

Key contributions:

- Refactored the existing frontend codebase to improve maintainability, performance, and user experience. Integrated the application with backend REST APIs using Next.js.
Implemented responsive layouts for a consistent experience across different screen sizes.
Added Dark Mode support.
 - Implemented date range filtering using a Date Picker to improve table filtering and data exploration.
 - Localized date presentation by converting Gregorian dates to the Persian (Jalali) calendar for improved readability and user experience.
 - Implemented and enhanced core features, including: SSO authentication
Sidebar navigation
Table search and filtering
 - Dashboard and management interfaces
Collaborated closely with backend engineers to deliver new features and ensure reliable API integration.
-

Technologies: Next.js, React, TypeScript, REST APIs, Tailwind CSS, Responsive Design.

GITHUB PROJECTS

Pizza Ordering App

Repo : <https://github.com/pourmandsafar76-a11y/fast-react-pizza-co>
<https://fast-react-pizza-co-tau.vercel.app>

A modern pizza ordering application built with React, Redux Toolkit, React Router, and Tailwind CSS.

Travel Package list

Repo : <https://github.com/pourmandsafar76-a11y/fast-react-pizza-co>
<https://travel-list-lemon-omega.vercel.app>

A modern React application for creating and managing a travel packing list. Users can add items, mark them as packed, sort the list, and track their packing progress through a clean and responsive interface.
